Complex Ecosystems. **Dynamic Solutions.**

Cybersecurity is more than countering threats.

It requires building long-term resilience, driving efficiencies, and supporting transformations that fuse emerging and legacy capabilities into new, streamlined security ecosystems.

A privately held cybersecurity services firm serving both private and public-sector customers, ShorePoint continuously disrupts adversaries and targets their evolving tactics to provide a heightened level of security in support of your mission. We proactively defend against a growing number of cyber threats while driving efficiency and reduced complexity in customer environments.

The cybersecurity challenge for large, mission-driven organizations is evolving and complex—requiring processes and solutions that engage people, infrastructure, and data. Our vision is to be the premier provider of cybersecurity and data transformation services, delivering a security model capable of keeping pace with today's rapidly changing landscape. We bring a team with experience from the integrator, product, and government points of view to help our customers ensure their cybersecurity strategy keeps pace with ongoing modernization initiatives.

Comprehensive Capabilities

CYBERSECURITY MODERNIZATION
- Cloud Security
- Zero Trust Architecture (ZTA) strategy and implementation
- Security Orchestration, Automation, and Response (SOAR)
- AI/ML use case development and application
- Trusted Internet Connection (TIC) modernization and use case support
- Container security
- Continuous monitoring
- Continuous authorization
- Agile security enhancement

CONTINUOUS DIAGNOSTICS AND MITIGATION (CDM)
- Aligning Agency cybersecurity strategic plans
- Capability implementation
- Technology evaluation and connection
- Elasticsearch capabilities
- Data analytics and integration
- Governance transformation
- Organizational transformation
- Training
- Security data analytics

SECURITY COMPLIANCE
- Control framework implementation/advisory services
- ISSO support
- FedRAMP support
- Security authorization
- Security assessment/Blue Team and Red Team engagements
- Policy development and implementation
- Process development
- Risk and vulnerability assessments

SECURITY OPERATIONS
- SOC operations
- Security architecture and engineering
- Threat modeling
- Hunt operations
- Incident response
- Forensics
- Reverse engineering/malware analysis
- Orchestration
- Security compliance
- Penetration testing/adversary emulation
- Vulnerability management
- High-Value asset security assessment and architecture support

DATA ANALYTICS & DIGITAL TRANSFORMATION
- Data engineering
- Data platform integration
- Data science
- Elasticsearch and Elastic Security expertise
- Secure data management
- Data quality
- Automated Legacy Knowledge Extraction for Meaningful Insights (ALKEMI)
- Trend analysis
- Dashboard development
- Data lifecycle optimization

ADVISORY SERVICES
- Cyber business/program strategy
- CISO strategic counsel
- Cybersecurity technology product/services evaluations
- Market insights and capture strategies
- Organizational and cyber operations process improvements

SHOREPOINT

For mission-critical peace of mind.

Who we are – the cyber elite.

ShorePoint team members are handpicked for their expertise and for their ability to collaborate, communicate, and adapt when clients face complex and evolving challenges, obstacles, and threats. Seventy-six percent of our staff hold expert-level technical certifications, such as:

- AWS Certified Cloud Practitioner, AWS Certified Developer Associate, AWS Certified Solutions Architect
- Certified Ethical Hacker (CEH)
- Certified Information Security Manager (CISM)

- Certified Information Systems Security Professional (CISSP)
- Certified in Risk & Information Security Control (CRISC)
- GIAC Certified Incident Handler (GCIH)
- Information Technology Infrastructure Library (ITIL)
- Project Management Professional (PMP)
- Certified Scrum Master (CSM)
- Security+
- Splunk Certified Power User, Splunk Core Certified User, Splunk Power User

Accessing ShorePoint's services & expertise.

Current and potential ShorePoint customers have a variety of options to access our robust, transformative security solutions:

- GSA MAS – Information Technology Services Subcategory (Contract number 47QTCA18D00MF)
  - IT Professional Services 54151S
  - Highly Adaptive Cybersecurity Services 54151HACS, including all subcategories
- GSA Centers of Excellence Discovery BPA – Information Security Small Business Set-Aside Procurements

Who we serve.

ShorePoint is a trusted partner across both the private and public sectors. Our customers turn to us for mission-critical peace of mind: the security, resilience, and freedom to focus on the delivery of public services and resources that communities and workforces rely on every day. Our customer diversity enables ShorePoint to unlock innovation to our customer's most pressing challenges. ShorePoint's experience ranges across federal civilian agencies, defense sector agencies, the Intelligence Community, and commercial entities in the information technology industry.

Excellence Recognized
Across The Industry

Corporate Details

ShorePoint is a small business in accordance with federal size standards.
